## Long-term performance

### Performance since launch

	2000	2001	2002	2003	2004	2005	2006	2007	2008	YTD 2009
NOSF Global Balanced	-	-	-17.7	11.0	10.2	19.0	3.2	16.7	-8.2	9.9
Benchmark	-	-	-17.0	15.3	6.7	18.2	3.0	9.3	-1.5	9.6

### Discrete past performance - percentage change

From	30/09/04	30/09/05	30/09/06	30/09/07	30/09/08
To	30/09/05	30/09/06	30/09/07	30/09/08	30/09/09
NOSF Global Balanced	21.3%	4.5%	12.4%	-9.0%	17.3%

All performance sourced from: Lipper, Datastream & ARC, as at 30 September 2009. Calculation basis: Sterling, total return, bid to bid, without initial charges, gross income reinvested, net of management fees.

### Risk factors

This is a financial promotion and is not intended as investment advice. Past performance is not a guide to future returns. The value of investments and the income from them can fall as well as rise and investors may not get back the original amount invested. The value of overseas securities will be influenced by fluctuations in exchange rates. If the portfolio invests in sub-investment grade bonds that typically have a low credit rating these carry a high degree of default risk, which can affect the capital value of your investment. If the portfolio has exposure to hedge funds, gold, private equity and property via publicly quoted transferable securities, there are additional risks associated with these sectors.

## Newton's themes

Newton is a global thematic stock picking company. Our style is team oriented and relies on effective communication between all of our investment personnel. Two of our themes are listed below, along with examples of individual holdings.

## All Change

### Factors

The previously benign period of stable growth, low inflation, and easy credit, which allowed private sector debt and financial leverage to grow to unsustainable levels (as described in a previous theme, "Becalmed") has come to an end. When assessing investments we assume that access to credit will remain difficult, which favours companies with limited financing requirements and argues against exposure to highly-indebted customers.

### Investments

Novartis, British American Tobacco, Standard Chartered, Nestle

## More Government

### Factors

The financial crisis and the recession that has followed in its wake have sharply reversed the trend of reducing the role of the state in the economy, especially in the developed world. With bigger government comes more regulation, higher taxes and the prospect, ultimately, of slower growth and higher economic volatility; local interests will take priority over global.

### Investments

No commercial banks or property in the USA, UK or Continental Europe, Barrick, Minas Buenaventura, Newcrest (gold)
