

Newton Offshore Strategy Fund | September 2007

Global Balanced

Objective

The objective of the Fund is to maximise the total return (both income and capital) provided to investors through investment in a diversified portfolio primarily of global equity and fixed interest securities.

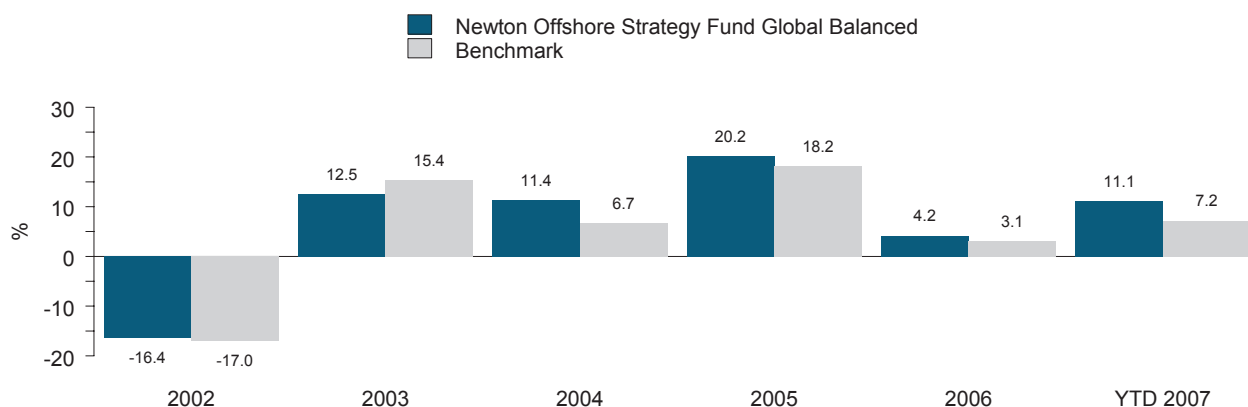

The composite benchmark for NOSF Global Balanced is the FTSE World Index (70%), the Citigroup WGBI Index (25%) and Libid 1 month GBP (5%).

Investment Philosophy

The Newton Offshore Strategy Fund (NOSF) has been designed by the Private Investment Management (PIM) department as an efficient and cost-effective alternative to direct portfolio management through individual stocks and shares. The Fund is invested in line with Newton's global thematic investment process, the same process that PIM uses for directly invested portfolios. Clients of PIM receive the same high level of service whether they invest in NOSF or directly.

All stock selection decisions are made by the manager of the NOSF fund within guidelines agreed by the board in consultation with PIM.

Performance

	Latest Quarter (%)	Since Launch 26 January 2001 (%)
NOSF Global Balanced (after fees)	3.8	22.1
NOSF Global Balanced (before fees)	4.1	32.1
Benchmark Return	2.5	18.9
FTSE W World	1.5	14.3
Citigroup WGBI	1.6	14.4
1 Month £ Libid	1.5	34.9

Source: Lipper, as at 30 September 2007, total return, bid to bid, gross income reinvested, without initial charges, unless otherwise stated figures are gross of management fees. Lipper fund returns are based on midday prices, whereas the index is priced at the close of the relevant markets.

Newton Offshore Strategy Fund Global Balanced	10.8%	8.4%	21.3%	4.5%	12.4%

Source: Lipper, as at 30 September 2007, total return, bid to bid, gross income reinvested, without initial charges, net of management fees. Lipper fund returns are based on midday prices.

Risk Factors

Past performance is not a guide to future returns. The value of investments and the income from them can fall as well as rise and investors may not get back the original amount invested. The value of overseas securities will be influenced by fluctuations in exchange rates. If the portfolio invests in sub-investment grade bonds that typically have a low credit rating these carry a high degree of default risk, which can affect the capital value of your investment. If the portfolio has exposure to hedge funds, gold, private equity and property via publicly quoted transferable securities, there are additional risks associated with these sectors.

Investment Themes

The identification of global themes is a key component in our investment strategy. Some of the themes that we are currently following in this portfolio are illustrated here as well as examples of individual holdings.

Population Dynamics

A nation's demographic profile has profound implications for its ongoing economic development influencing its patterns of growth, consumption and savings, fiscal policy, healthcare regimes and competitive advantage. Industrialised economies have broadly ageing populations while some developing economies have significantly different profiles.

Beneficiaries: DBS Group Holdings, Parkway Holdings, Axa Asia Pacific, Millicom Intl Cellular

Global Realignment

Stronger growth and increasing economic influence of the developing world is challenging the western industrialised nations' domination in terms of wealth, consumption of both natural resources and finished goods and market capitalisation of global stock markets. Some realignment over time is inevitable reflecting the developing world's accumulation of foreign exchange reserves and trade surpluses.

Beneficiaries: Pacific Basin Shipping, BHP Billiton, MTN Group, Findlay Park Latin American Fund
